This is the WILD symbol and substitutes for all symbols except for BONUS and MONEY symbols. The WILD symbol appears on all reels.

This is the BONUS symbol. It appears on reels 2, 3 and 4.

MONEY SYMBOLS

These are the MONEY symbols. They appear on all reels.
Each spin, the MONEY symbols take a random value from a pre-defined set.
There are 4 types of MONEY symbols:

MONEY symbol with money value - It shows a random money amount based on current bet.

MYSTERY MONEY symbol - A random money amount is revealed on it at the end of the respin feature.

WILD MONEY symbol - A random money amount is revealed at the end of the respin feature. In the base game it also functions as a WILD and substitutes for symbols except BONUS and MONEY symbols.

JACKPOT MONEY symbol - Can appear only during the respin feature. When it hits it awards one point towards winning the jackpot bonus game and a random money amount is revealed on it.

Hitting any 5 MONEY symbols at the end of a spin triggers the MONEY RESPIN round.
If 3 MONEY symbols of any type hit on the middle reel in the base game the size of the game area increases from 3x5 to 4x5 or 5x5 randomly for the current spin and subsequent round if triggered, thus increasing the number of paylines and possible number of MONEY symbols in respin.

AMAZING MONEY MACHINE FEATURE

A visual machine is present in the game, next to the reels.
Randomly during the base game and respin feature, at any spin the machine can throw random symbols to the reels, replacing what is there as follows:
In the base game it can throw value, mystery or wild money symbols, normal WILD symbols or instant JACKPOT symbol.
During the respin round it can also throw JACKPOT money symbols.

MONEY RESPIN FEATURE

The MONEY RESPIN feature starts after all win combinations for the base game are paid.
The normal symbols fade away and only the MONEY symbols that triggered the feature remain.
The normal reels are replaced with special reels containing only MONEY symbols and empty spaces.
You start with a number of respins equal to the number of the MONEY symbols that triggered the feature.
All MONEY symbols that hit remain on the screen until the end of the round.
Every MONEY symbol that hits during the round adds one more respin.
The round continues until respins are finished or all positions on the screen are filled with MONEY symbols.
The round is played on a 3x5, 4x5 or 5x5 grid depending if the round was triggered with 3 MONEY symbols on the middle reel. Filling the middle reel with MONEY symbols during the round does not expand the grid.
During the round, at random respins the machine can throw MONEY symbols to the screen in empty positions that will count towards the total win of the round.
Hit and collect 3 JACKPOT money symbols during the respin round to win the JACKPOT BONUS feature.
When a JACKPOT BONUS feature is won it will be played after the current round ends.
When the MONEY RESPIN feature is complete the values of all MONEY symbols are added and the game pays the total amount.
If all positions are filled, the round is retriggered and starts again, with 5 initial respins. Every MONEY symbol hit during retriggered rounds adds one more respin.

JACKPOT BONUS FEATURE

Hit 3 BONUS symbols on reels 2, 3 and 4, collect 3 JACKPOT MONEY symbols during the respin round or hit an instant jackpot from the machine in the base game to trigger the JACKPOT BONUS feature.

In the bonus game pick coins to reveal jackpot names behind them. Match 3 of the same symbol to be awarded the corresponding jackpot.

INSTANT JACKPOT FEATURE

This is the INSTANT JACKPOT symbol. Randomly at any spin the machine can throw an INSTANT JACKPOT symbol to trigger the JACKPOT BONUS feature instantly.

INSTANT MONEY RESPIN FEATURE

Randomly at any spin, the machine can throw 5 or more MONEY symbols of any kind to random positions on the screen to instantly trigger the MONEY RESPIN feature.

MAX WIN

The maximum win amount is limited to 5,100x bet in base game, respin or jackpot bonus. If the total win of any spin including all features or modifiers reaches 5,100x bet the round immediately ends, wins are awarded and all wins above this amount are forfeited.

VOLATILITY ⚡⚡⚡⚡

This is the Mystery symbol. It appears when the top left corner of the reel unlocks and randomly during the FREE SPINS FEATURE. When it hits, at the end of the spin, all Mystery symbols on the screen transform into the same paying symbols randomly.

VARIABLE NUMBER OF WAYS TO WIN

Wins are awarded from left to right for adjacent symbol combinations. Each reel can have up to 6 symbols, depending on the state of the game. The maximum number of ways to win is 7776.

TUMBLE FEATURE

The TUMBLE FEATURE means that after every spin, winning combinations are paid and all winning symbols disappear. The remaining symbols fall to the bottom of the screen and the empty positions are replaced with new symbols coming from above.

Tumbling will continue until no more winning combinations appear as a result of a tumble or the FREE SPINS FEATURE is triggered.

All wins are added to the player's balance after all of the tumbles resulted from a base spin have been played.

SYMBOL UNLOCKING

At the beginning of every base game spin all 4 corners of the game are covered. Every two tumbles unlocks one of the corners, triggering a feature every time a new corner is unlocked, adding more symbols to the grid and increasing the number of possible ways to win.

When the top left corner is unlocked mystery symbols are revealed. All mystery symbols are automatically replaced with a random paying symbol.

When the top right corner is unlocked up to three low value symbols are replaced with up to three high value symbols.

When the bottom left corner is unlocked all symbols on reels 1 and 2 are replaced with big, 2x2 expanded symbols for the current and all subsequent tumbles.

When the bottom right corner is unlocked all symbols on reels 4 and 5 are replaced with big, 2x2 expanded symbols for the current and all subsequent tumbles.

After all of the corners have been unlocked and there are no more possible tumbles the FREE SPINS FEATURE is triggered.

FREE SPINS RULES

The FREE SPINS round is played on a full 5x6 grid and 7776 ways. The round starts with 5 free spins.

At every free spin one of the following features is triggered randomly:

MYSTERY SYMBOLS - Mystery symbols hit on the screen and transform into the same random paying symbol.

SYMBOL TRANSFORM - Up to 3 low paying symbols on the screen transform into high paying symbols randomly

GIANT SYMBOLS - Expanded 2x2 symbols hit on reels 1,2 and 4,5 for the initial spin and all subsequent tumbles.

Special reels are in play during the FREE SPINS feature.

Feature cannot be retriggered.

SPOĻU SABRUKŠANA

BRŪKOŠĀS PAPILDSPĒLES laikā pēc katra grieziena tiek izmaksāti laimesti par laimējošām kombinācijām, bet visi laimējošie simboli pazūd. Atlikušie simboli krīt uz leju, bet tukšās vietas ieņem no augšas krītošie simboli.

Spoļu brukšana turpināsies, kamēr vairs nebūs laimīgo kombināciju.

Visi laimesti tiek ieskaitīti spēlētāja kontā pēc tam, kad pirmā grieziena izraisītā brukšana ir beigusies.

Šis ir NAUDAS SIMBOLS. Tas var parādīties uz visām spoļēm.

Katrā griezienā NAUDAS SIMBOLAM tiek piešķirta nejauši izvēlēta vērtība no iepriekš noteiktām vērtībām: 1x, 2x, 3x, 4x, 5x, 6x, 8x, 10x, 12x, 15x, 20x, 25x, 50x, 100x, 250x vai 500x kopējās likmes apmērā.

NAUDAS SIMBOLI KĀ LAIMESTA REIZINĀTĀJI

Katru reizi, kad vienlaicīgi tiek uzgriezti 3 NAUDAS simboli vai šie simboli tiek iegūti brukšanas rezultātā, to vērtības pārvēršas laimesta reizinātājos, kas tiek saskaitīti kopā un piemēroti laimestiem visām nākamajām brukšanas reizēm šajā ciklā. Arī NAUDAS simbolu, kas tiek uzgriezti pēc 3. simbola, vērtības tiks pārvērstas laimestu reizinātājos, kas tiks pieskaitīti pie laimesta kopsummas reizinātāja.

Ja grieziena rezultātā pirms brukšanas tiek uzgriezti 3 NAUDAS simboli, bet laimests netiek gūts, šo NAUDAS simbolu vērtība tiek pārvērsta par reizinātājiem, tie tiek saskaitīti kopā, nolikti malā un spēle atkārtoti griež visus uz ekrāna redzamos simbolus līdz brīdim, kad tiek iegūta vismaz viena laimesta kombinācija. Visi šīs darbības rezultātā gūtie laimesti tiks reizināti ar iepriekš sakrāto laimesta reizinātāju. Šo atkārtoto griezienu un visu nākamo brukšanu laikā spēlē ir aktīvas īpašas spoles bez NAUDAS simboliem.

NAUDAS ATTĪSTĪBA

Uzgriez 4 vai vairāk NAUDAS simbolus vienlaicīgi vai brukšanas rezultātā, lai aktivizētu NAUDAS

ATKĀRTOTO GRIEZIENU papildspēli.

Papildspēles sākumā pamatspēles spoles tiek aizstātas ar 4x5 pozīciju laukumu.

Raunda laikā griežas tikai NAUDAS SIMBOLI un īpašie simboli, un tie var apstāties

jebkurā atvērtajā pozīcijā uz spēles laukuma.

Raunds sākas, NAUDAS SIMBOLIEM saglabājot savas pozīcijas no pamatspēles.

Sākt ar 3 atkārtotiem griezieniem. Visi simboli, kas tiek uzgriezti paliek uz ekrāna līdz raunda beigām.

Katru reizi, kad tiek uzgriezts jebkurš simbols, atkārtoto griezienu skaits kļūst 3.

Raunds beidzas, kad vairs nav atkārtoto griezienu vai ekrāns ir pilns ar simboliem.

Raunda beigās tiek izmaksātas visas sakrātās summas.

Atkārtoto griezienu laikā ir iespējams uzgriezt šādus simbolus:

NAUDAS simbols ar nejaušām sākotnējām vērtībām.

Šis ir VĒRTĪBAS PIESKAITĪŠANAS simbols. Katru reizi, kad tas tiek uzgriezts, visiem uz ekrāna esošajiem NAUDAS simboliem tiek pieskaitīta no NAUDAS simbolu vērtību diapazona nejauši izvēlēta vērtība. Pēc pieskaitīšanas izpildes tas pārvēršas par NAUDAS simbolu ar vērtību, kas vienāda ar pieskaitīto vērtību.

Šis ir REIZINĀŠANAS simbols. Katru reizi, kad tas tiek uzgriezts, tas reizina 2-5 uz ekrāna esošus nejauši izvēlētos NAUDAS simbolus ar nejauši izvēlētu reizinātāju x2, x3, x4 vai x5 apmērā. Pēc reizināšanas izpildes tas pārvēršas par NAUDAS simbolu ar vērtību, kas vienāda ar kopējo likmju reizinātāja vērtību.

Šis ir SAVĀKŠANAS simbols. Katru reizi, kad tas tiek uzgriezts, tas savāc visu uz ekrāna esošo NAUDAS simbolu vērtības. Pēc savākšanas izpildes, tas pārvēršas par NAUDAS simbolu ar savāktu vērtību.

Šis ir ATKLĀT simbols. Kad tas tiek uzgriezts pirmo reizi raunda laikā, tas atklāj vistālāko labo spoli, paplašinot laukumu līdz 5x5. Kad tas tiek uzgriezts otro reizi raunda laikā, tas atklāj vistālāko kreiso spoli, paplašinot laukumu līdz 6x5. Pēc tā uzgriešanas, tas pārvēršas par NAUDAS simbolu ar nejaušu vērtību.

Šis ir paliekošais PIESKAITĪŠANAS simbols. Katru reizi, kad tas tiek uzgriezts, tam tiek piešķirta nejauša vērtība no NAUDAS simbolu vērtībām. Šī vērtība tiek pieskaitīta visiem NAUDAS simboliem uz ekrāna šajā un visos nākamajos atkārtotajos griezienos.

Šis ir paliekošā REIZINĀTĀJA simbols. Katru reizi, kad tas tiek uzgriezts, tam tiek piešķirta nejauša x2, x3, x4 vai x5 vērtība. Pašreizējā griezienā un visos nākamajos atkārtotajos griezienos līdz raunda beigām 2 līdz 5 nejauši izvēlēti NAUDAS simbolu vērtība tiek reizināta ar šo reizinātāju.

Šis ir paliekošais SAVĀKŠANAS simbols. Katru reizi, kad tas tiek uzgriezts, visos nākamajos atkārtotajos griezienos līdz raunda beigām tas savāc visu uz ekrāna esošo NAUDAS simbolu vērtību.

Secība, kurā modifikatori tiek piemēroti NAUDAS simboliem uz ekrāna ir šādi: PIESKAITĪT, REIZINĀT, SAVĀKT, tad paliekošais PIESKAITĪT, paliekošais REIZINĀT, paliekošais SAVĀKT un tad ATKLĀT. Visu paliekošo simbolu vērtību neietekmē jebkādi citi modifikatori.

Ja spēles laukums ir pilnībā atklāts līdz 6x5 pozīcijām un pilnībā aizpildīts, raunds beidzas un laimesta kopsummai tiek pieskaitīts laimests 500x kopējās likmes apmērā.

MAKSIMĀLAIS LAIMESTS

Maksimālā laimesta summa ir ierobežota līdz 20,000x likmei. Ja papildspēles laimesta kopsumma katra griezienu laikā sasniedz 20,000x likmi, raunds tiek nekavējoties beigts, tiek piešķirts laimests un visas atlikušās papildspēles tiek izbeigtas.

ATKĀRTOTO GRIEZIENU PIRKŠANA

ATKĀRTOTO GRIEZIENU PAPILDSPĒLI var aktivizēt pamatspēles laikā, nopērkot to par summu, kas vienāda ar 100x kopējo likmi.

NAUDAS simbolu vērtības pamatspēles griezienā, kas aktivizēja papildspēli, ir nejaušas.

CASH ELEVATOR FEATURE

The game represents an elevator in a building with 13 floors and a basement.

On the 1st floor all paying symbols are present on the reel strips.

Starting from 2nd floor, on every floor, the lowest value symbols are removed from the reel strips progressively, leaving only higher value symbols, as follows:

2nd floor - lowest symbol present is

7th floor - lowest symbol present is

3rd floor - lowest symbol present is

8th floor - lowest symbol present is

4th floor - lowest symbol present is

9th floor - lowest symbol present is

5th floor - lowest symbol present is

10th floor - lowest symbol present is

6th floor - lowest symbol present is

11th floor - lowest symbol present is

12th floor - lowest symbol present is

The game starts on the 1st floor.

Whenever a winning combination is awarded with the lowest symbol from that floor, the game goes up by 1 floor.

These are ARROW symbols.
They can only land on reel 3.

Whenever an UP arrow symbol hits, it moves the game by 1, 2, 3 or 12 floors up from the current one.
Whenever a DOWN arrow symbol hits, it moves the game by 1, 2, or 3 floors down from the current one.

The current floor is saved for every possible bet and returning to a certain bet will move the game to that floor.

Changing the bet to a level that was never saved before, resets the game back to 1st floor.

DEAD LOVERS FREE SPINS

Whenever a full 1x3 WILD symbol hits on reel 2 or reel 4, the DEAD LOVERS free spins is awarded

Before the round starts pick 1 out of 3 options to get a number of free spins from 6 to 12 randomly.

If the round started by hitting a 1x3 WILD symbol on both reels 2 and 4, in the pick round you can get 12 to 24 free spins randomly.

When the round starts, the game moves to a random floor from 1 to 12.

The DEAD LOVERS free spins has a progressive feature.

The round starts with full 1x3 WILD symbols present on the screen on reels 1 and 5. They remain on the screen until the end of the round and move to different reels at different free spins depending on what is hit during the round. After every free spin with a win containing the lowest symbol of the current floor, the 1x3 Wild symbols move one reel towards each other, first to reels 2 and 4, then meeting in reel 3, where they merge into a single symbol and award 5 more free spins. More wins with the lowest symbol of the current floor splits them again, moving them back to reels 2 and 4, then to 1 and 5, after which they start to move towards each other again. This moving pattern can happen indefinitely until all free spins are played and the round ends.

After the round ends the game moves back to the floor where it was before free spins started.

Special reels are in play during this feature.

HOLD AND SPIN FEATURE

Whenever the game moves to floor 13 by any means, the HOLD AND SPIN feature is triggered.

Before the round starts, the game moves to a random floor from 1 to 12.

These are MONEY symbols. During the HOLD AND SPIN feature only MONEY symbols and blank spaces are present on the reels.

MONEY symbol with random value taken from a pre-defined set at every respin.

MONEY symbol with a random multiplier that applies to the total win of the round. Possible values are: 2x, 3x, 5x and 10x. If more than one multiplier are present in the same respin round, the values multiply between themselves.

MONEY symbol with floor value. A fixed amount depending on the floor the feature is played on.

Before the round starts, pick one out of 3 options to determine a random number of MONEY symbols to start the round with, from 3 to 11, distributed on random positions on the screen.

The round starts with 4 respins. All MONEY symbols that hit after each respin, remain on the screen until the end of the round. Every time at least 1 MONEY symbol hits, the number of respins is reset back to 4. The round continues until the all respins are finished or all positions on the screen are filled with MONEY symbols.

After the round is complete the values of all MONEY symbols are added together, multipliers are applied and the game pays the total amount

After the round ends, the game moves to a random floor from 1 to 12.

BASEMENT FEATURE

When the game moves by any means to a floor lower than the 1st, it is automatically moved to a random floor from 1st to 12th.

MAX WIN

The maximum win amount is limited to 20,000x bet. If the total win of any feature reaches 20,000x the round immediately ends, win is awarded and all remaining free spins are forfeited

TUMBLE FEATURE

The TUMBLE FEATURE means that after every spin, winning combinations are paid and all winning symbols disappear. The remaining symbols fall to the bottom of the screen and the empty positions are replaced with new symbols coming from above.

Tumbling will continue until no more winning combinations or spin features appear as a result of a tumble. All wins are added to the player's balance after all of the tumbles and spin features resulted from a base spin have been played.

PROGRESSIVE FEATURE

In normal play whenever at least a size upgrade or a multiplier upgrade symbol hits, after all tumbles generated from the current spin end, an egg drops on the screen and reveals a cluster of the same random paying symbol, replacing what is currently on the screen.

If more upgrade symbols hit after the first drop, when all tumbles generated from the initial drop end, another egg will drop. This continues until there are no more upgrade symbols hitting.

This is the size upgrade symbol. Whenever it hits it upgrades the size of the next egg drop to 2x2, 3x3, 4x4, 5x5 and 6x6, progressively.

This is the multiplier upgrade symbol. Whenever it hits it increases the win multiplier for the next egg drop, from 2x to 11x progressively. The multiplier applies to the win of the clusters resulted from the egg drop.

The spin ends and all upgrades are reset after all tumbles end, no more upgrade symbols hit and the last egg dropped.

FREE SPINS

Hit 4, 5 or 6 BONUS symbols to trigger 10, 15 or 20 free spins, respectively.

During the FREE SPINS round, all upgrade symbols that hit remain in effect until the end of the round.

In FREE SPINS, at every spin, after all tumbles generated from the initial spin end an egg drop is guaranteed.

Hit 4 or more BONUS symbols during the round, to retrigger the feature and get 5 more free spins. No limits!

Special reels are in play during the feature.

MAX WIN

The maximum win amount is limited to 5,000x bet. If the total win of a feature including tumbles or modifiers reaches 5,000x bet the round immediately ends, win is awarded and all remaining features are forfeited.

High volatility games pay out less often on average but the chance to hit big wins in a short time span is higher.

Only the highest win is paid per winning combination.

When winning with multiple blocks all wins are added to the total win.

All wins are multiplied by base bet.

All values are expressed as actual wins in coins.

Free spins win is awarded to the player after the round completes.

Total win including MODIFIERS in the history contains the whole win of the cycle.

Šis simbols ir WILD un var aizstāt visus simbolus, izņemot SCATTER. WILD simbols parādās tikai uz 2., 3., 4. un 5. spoles. Katru reizi, kad tiek uzgriezts WILD simbols, tam tiek piešķirts nejaušs x2 vai x3 reizinātājs, kas tiek piemērots visām laimesta kombinācijām ar šo WILD simbolu. Ja vairāki WILDS simboli veido vienu laimesta kombināciju, to reizinātāji tiek saskaitīti.

Šis ir SCATTER simbols. Tas parādās uz visām spolēm un piešķir laimestu jebkurā pozīcijā. Uzgriez 3 vai vairāk SCATTER simbolus, lai uzsāktu BEZMAKSAS GRIEZIENU papildspēli. Par 3 vai vairāk SCATTER simboliem tiek izmaksāta 5x kopējā likme.

ATKĀRTOTO GRIEZIENU PAPILDSPĒLE

Pamatspēles laikā, katru reizi, kad uz 1. spoles ir vertikāla viena kaķa simbolu kaudze, tā var aktivizēt atkārtoto griezienu papildspēli. Visi viena veida kaķa simboli un WILD simboli paliek uz ekrāna līdz atkārtoto griezienu beigām, bet visas pārējās pozīcijas tiek grieztas atkārtoti līdz brīdim, kad tiek izveidota laimesta kombinācija ar kaķa simbolu.

BEZMAKSAS GRIEZIENI

Par 3, 4 vai 5 SCATTER simbolu uzgriešanu pamatspēles laikā tiek piešķirti 8, 12 vai 16 bezmaksas griezieni. BEZMAKSAS GRIEZIENU raundā visi WILD simboli, kas tiek uzgriezti uz 2., 3., 4. un 5. spoles, paliks uz ekrāna visu raunda laiku. Šiem LĪPĪGAJIEM WILD simboliem ir nejaušs reizinātājs x2 vai x3 apmērā, kas saglabājas nemainīgs līdz raunda beigām. Ja pilns jebkura kaķa simbola komplekts tiek uzgriezts uz 1. spoles BEZMAKSAS GRIEZIENU raunda laikā, tiek piešķirti 2 bezmaksas griezieni.

Papildspēles laikā tiek izmantotas īpašās spoles.

MAKSIMĀLAIS LAIMESTS

Maksimālā laimesta summa ir ierobežota līdz 5,000x likmei pamatspēles laikā un jebkuras papildspēles laikā. Ja kopējā laimesta summa sasniedz 5,000x likmi, raunds tiek nekavējoties beigts, tiek piešķirts laimests un visas atlikušas papildspēles tiek izbeigtas.

PIRKT BEZMAKSAS GRIEZIENUS

BEZMAKSAS GRIEZIENU RAUNDU var uzsākt pamatspēles laikā, nopērkot to par summu, kas vienāda ar 100x kopējo likmi.

Pērkot BEZMAKSAS GRIEZIENU papildspēli, aktivizēšanas griezienā var tikt nejauši uzgriezti 3, 4 vai 5 SCATTER simboli.

POWERNUDGE FEATURE

Whenever a winning combination hits, the win is paid and the reels that contained at least one winning symbol automatically nudge down one spot to reveal another symbol from the top and the reels that did not contain a winning symbol respin. After that the game pays again for all winning combinations on the screen. The nudge feature ends only when there are no more winning combinations on the screen.

This is the MYSTERY MONEY symbol. It can appear on all reels. Whenever 6 or more MYSTERY MONEY symbols hit in the base game, they trigger the MONEY RESPIN feature.

MONEY RESPIN FEATURE

When the MONEY RESPIN feature starts, the normal reels fade away and only the MYSTERY MONEY symbols and blank symbols remain.

During the round, on top of every reel there is a multiplier, starting from x1.

After every spin, the MYSTERY MONEY symbols reveal randomly one of the following:

- Money value - A random value from a pre-defined set from 0.1x total bet to 50x total bet, without Ante bet increase included.

Possible values are: 0.1x, 0.2x, 0.3x, 0.4x, 0.5x, 0.6x, 0.8x, 1x, 1.5x, 2x, 2.5x, 4x, 5x, 10x, 20x or 50x total bet.

- Local multiplier - A random multiplier of x1, x2 or x3 which is going to be added to the one on top of the MONEY symbol

- Global multiplier - A random multiplier of x1, x2 or x3 which is going to be added to all multipliers on top of the game.

After reveal, all the MONEY symbols that have gotten a money value will be multiplied by the multiplier from the reel they are on and their value is added to the total win, after which the MYSTERY MONEY symbols transform back to their original state.

The game will keep nudging and respining until there are no more MYSTERY MONEY symbols on the screen. Special reels are in play during the feature.

MAX WIN

The maximum win amount is limited to 4,000x bet. If the total win of a RESPIN feature reaches 4,000x the round immediately ends, win is awarded and all remaining respins are forfeited.

ANTE BET

The player has the option to select the bet multiplier. Depending on the selected bet, the game behaves differently. The possible values are:

Bet multiplier 20x - Normal Play

Bet multiplier 25x - The chance to win the RESPIN feature naturally is doubled. More MYSTERY MONEY symbols are present on the reels.

BUY RESPIN FEATURE

The RESPIN feature can be instantly triggered from the base game by buying it for 100x current total bet.

When buying the RESPIN feature the spin that triggers the feature will award 6 or 7 MYSTERY MONEY symbols randomly.

MODIFIERS

In the base game, at random spins, modifiers can happen as follows:

GREEDY WOLF WILD

Randomly fully stacked and expanded WOLF symbol can hit on reel 3. When this happens all PIG symbols transform into WOLF symbol. The game pays all winning combinations after the transformation.

3 LITTLE PIGS WILDS AND RESPINS

At random spins a random number of WILDS can be added to the screen on reels 1, 2 or 3.

All winning combinations are based on the grid with WILDS added.

Then the WOLF comes and has a chance to move the WILDS one position to the right and trigger a respin or blow the WILDS all out of the screen and end the feature. Respins can happen until there are no more positions to move the WILDS to the right or they are randomly blown out of the screen.

The game pays all winning combinations between each respin.

GUARANTEED WIN

Randomly on a spin that results in no win the wolf can come into the screen and blow all symbols away. Then new symbols fall from the top which are guaranteed to result in a win of either 20x total bet or higher or enough SCATTERS to trigger the FREE SPINS round.

FREE SPINS

Hit 6 or more SCATTER symbols to trigger the FREE SPINS round. The round starts with 6 free spins.

When the round starts the positions of all SCATTERS that triggered the feature are marked with a square made of straw. During the round whenever a SCATTER symbol hits its position will be either marked with a straw square if is not already marked or the square will be progressively upgraded to wood, then brick, then

castle. The markings remain in position until the end of the round.

At the end of the round, after all free spins have finished, the marked positions transform into houses and the WOLF comes into the screen, blows the houses away and reveals random money prizes behind each

house. The prizes are higher based on the type of house.

Possible values are: 1x, 2x, 3x, 4x, 5x, 6x, 7x, 8x, 10x, 15x, 20x, 25x, 30x, 40x, 50x, 75x, 100x, 200x, 300x or 500x total bet.

If during the round all marked positions are upgraded to the highest level, they will immediately turn into castles, reveal random money prizes and the round ends. All remaining free spins are forfeited.

Hit 3, 4 or 5 SCATTER symbols during the round to win 1, 2 or 4 more free spins, respectively.

Special reels are in play during the round.

MAX WIN

The maximum win amount is limited to 3,000x bet in both base game and free spins. If the total win of a FREE SPINS round reaches 3,000x bet the round immediately ends, win is awarded and all remaining free spins are forfeited

ANTE BET

This is the red WILD symbol and substitutes for all red symbols	This is the green WILD symbol and substitutes for all green symbols	This is the purple WILD symbol and substitutes for all purple symbols	This is the blue WILD symbol and substitutes for all blue symbols

This is the SCATTER symbol.
It appears on reels 1, 3 and 5.
Whenever 3 SCATTER symbols hit they trigger the POWERNUDGE RESPIN feature.

This is the MYSTERY symbol. It can appear on all reels.
Whenever MYSTERY symbols hit they trigger the POWERNUDGE feature.
All MYSTERY symbols open to reveal something behind them. In the base game they can reveal one of the color code WILD symbols or a GOLDEN symbol.

This is the GOLDEN symbol.

Whenever the GOLDEN symbol is revealed all positions with MYSTERY symbols respin to reveal a random money value expressed as multiplier of total bet or a SCATTER symbol. The total of all MONEY values revealed is paid and if enough SCATTER symbols to trigger the feature are revealed, the feature will start at the end of all nudges.
Then, as long as MYSTERY symbols are in the screen all reels with MYSTERY symbols automatically nudge down one spot to reveal another symbol from the top and the other reels respin. After that the game pays again for all winning combinations on the screen and MYSTERY symbols reveal something new at random.
The nudge feature ends only when there are no more MYSTERY symbols on the screen.

POWERNUDGE RESPIN FEATURE

Whenever 3 or more SCATTER symbols hit, the POWERNUDGE RESPIN feature is triggered.
When the round starts an automatic spin is done that results in at least 8 MYSTERY symbols, split between two random reels. Then the game will nudge and respin the same way as in the base game.
The round ends when there are no more MYSTERY symbols on the screen, after nudges and

respins triggered by the initial spin.

During the round, the MYSTERY symbols can reveal a new symbol from respins of the golden one, the NUDGE UP symbol. If it hits, the subsequent nudge of reels with MYSTERY symbols, will be up instead of down. If there are more than one NUDGE UP symbols on the screen revealed at the same time, the subsequent nudge will move the reels a number of positions up, equal to the number of NUDGE UP symbols hit.

During the round, a multiplier that applies to the win of every respin is present. The multiplier starts from x1 at the initial spin and increases by x1 for every subsequent nudge and respin.

SCATTER symbols cannot be hit during the POWERNUDGE RESPIN feature and thus the feature cannot be retriggered.

MAX WIN

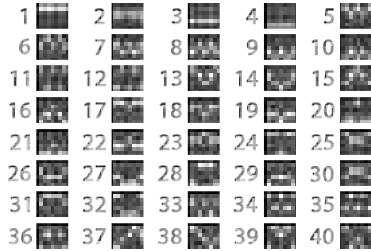

The maximum win amount is limited to 5,000x bet. If the total win of a RESPIN feature reaches 5,000x the round immediately ends, win is awarded and all remaining respins are forfeited.

BUY RESPIN FEATURE

The POWERNUDGE RESPIN feature can be instantly triggered from the base game by buying it for 100x current total bet.

HOLD AND SPIN FEATURE

The HOLD AND SPIN FEATURE starts after all win combinations for the lines are paid. The normal symbols fade away and only the money symbols that triggered the feature remain. The normal reels are replaced with special reels containing only money symbols and empty spaces.

You start with 4 respins. All money symbols that hit after each respin remain on the screen until the end of the round. Every time at least one money symbol hits, the number of respins is reset to 4. The round continues until respins are finished or all positions on the screen are filled with money symbols.

When the MONEY RESPIN feature is complete, the values of all money symbols are added and the game pays the total amount.
If during the HOLD AND SPIN FEATURE the screen is filled with money symbols, the BIG MONEY WHEEL BONUS is triggered.

The wheel spins awarding a random prize or a blank. Possible prizes are:

10x, 20x, 30x, 40x, 50x, 60x, 70x, 80x, 90x, 100x, 200x, 300x, 400x, 500x, 600x, 700x, 800x, 900x, 1000x, 2000x or 5000x.

Whenever a value is awarded, the wheel spins again. Whenever a blank is awarded the round ends. After all wheel spins finish, all prizes awarded by the HOLD AND SPIN FEATURE and the MONEY WHEEL BONUS are added together and pay.

GAME RULES

The game is formed by a 1x5 slot and a score card containing a fixed grid of 3x3 symbols, with 8 fixed paylines. To win in the game spin the slot. All symbols that hit will highlight on the score card. Whenever at least one of the fixed paylines on the score card is filled with highlighted symbols, a free respin is triggered. More symbols can hit as a result of the respin and they also highlight on the score card. The respins continue as long as new paylines are being formed or the respin symbol is hit in the slot. At the end of the respins cycle the game pays an amount according to the number of lines highlighted so far.

MAGIC MONEY MAZE BOARD BONUS

Hit 3 or more BONUS symbols to trigger the MAGIC MONEY MAZE BOARD BONUS. Depending on the number of BONUS symbols hit, the subsequent bonus round will start with a different number of lives, as follows:

5 BONUS symbols - 4 lives
4 BONUS symbols - 2 lives
3 BONUS symbols - 1 life

In the BONUS game the player is presented with a board of 49 squares, on a grid of 7x7. The player is represented by a monkey head which, in the beginning of the game is placed in a random position on the outer edge of the board.

At the beginning of the game, random items are placed in random squares on the grid: money awards, snakes, scorpions and hearts. In fixed positions on the board the following items are present: President portraits in the corners of the board, arrows in the middle positions of the outer edge and the MAGIC MONEY MAZE symbol in the center position.

During the game, for every roll, 1 dice gives a random result, from 1 to 6 dots. After every roll, the monkey head moves a number of places on the board, in a clockwise manner, according to the total number of dots from the dice.

The monkey head can land on a square with one of the following:

Money award - A random value from 0.1x to 1000x total bet. Landing on a square with money award adds this value to the total win of the round.

Snake or Scorpion - Whenever the monkey head lands on a snake or a scorpion one life is lost.

Heart - Whenever the monkey head lands on a heart one life is given. The maximum number of lives that can be collected is 3.

Any president portrait - The first time the monkey head lands on a president portrait, that portrait is collected. When 2, 3 or 4 are collected, a multiplier of x2, x3 or x10 respectively is won. The multiplier applies to the total win of the round.

Arrows - When the monkey head lands on an arrow it will be automatically moved to the position at the end of the arrow.

MAGIC MONEY MAZE symbol - Every time the monkey head lands in the center of the board, a multiplier is applied to random money awards. The first time this happens the multiplier is x2, second time x3, third time x4, fourth time x5 and x10 for every subsequent time after the fourth. The monkey head is then automatically moved to a new random position on the outer edge of the board.

The round ends when there are no more lives. At the end of the round, the total amount collected so far is awarded.

MAX WIN

The maximum win amount is limited to 10,000x bet. If the total win of a round reaches 10,000x bet the round immediately ends, win is awarded and all remaining features are forfeited.

GAME RULES

Symbols pay anywhere on the screen, in pairs of two. Whenever two halves with the same value face each other they join to form a whole bill symbol.

The amount on the bill symbol is paid to the player. If there are more winning bills on the screen, the total amount is paid.

Winning combinations happen on reels 1 and 2, 3 and 4 and 5 and 6.

This is WILD and substitutes for all symbols except for SCATTER. It appears on all reels.

When a WILD symbol hits facing a regular symbol, it will transform into a symbol with the same value as the one it faces. Then, the two matching halves will merge into a whole bill and the amount will be paid.

If two WILD symbols hit facing each other, they will join into a whole WILD bill that will take a random value.

This is the SCATTER symbol. It appears on all reels.

If two SCATTER symbols hit on the screen facing each other, they will merge into a SCATTER bill.

1 SCATTER bill awards 8 free games.

2 SCATTER bills award 8 FREE GAMES and remove the lowest paying symbols from the reel strips during the round.

3 SCATTER bills award 8 FREE GAMES and remove the lowest two paying symbols from the reel strips during the round.

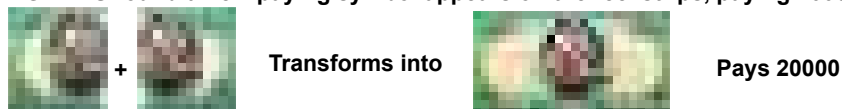

RANDOM MODIFIERS

Randomly, at any spin one of the following random modifiers can hit:

- Free games can randomly be awarded.
- After the reels stop up to 3 symbols are replaced with halves to match the one facing them awarding winning bills
- During the spin 2, 3 or 4 WILDS appear on the screen in random positions.

FREE GAMES

During the FREE GAMES round a new paying symbol appears on the reel strips, paying 1000x total bet.

During the FREE GAMES round, random multipliers of 2x or 3x can appear over the symbols. If a winning bill is formed, any multipliers that appear on top of it will apply to the value of the bill. If there are two multipliers on the same winning bill, they will multiply each other before multiplying the value of the bill.

During the FREE GAMES round, depending on the number of SCATTER bills that triggered the feature, the lowest paying symbols are removed from the reel strips for the remainder of the round, as follows:

- If round was triggered by 1 SCATTER symbol - 0.25x symbol is removed at free game 2, 0.5x symbol is removed at free game 4, 1x symbol is removed at free game 6 and 2x symbol is removed at free game 8.
- If round was triggered by 2 SCATTER symbols - 0.5x symbol is removed at free game 2, 1x symbol is removed at free game 4 and 2x symbol is removed at free game 6.
- If round was triggered by 3 SCATTER symbols - 1x symbol is removed at free game 2, 2x symbol is removed at free game 4.

If as a result of a tumble, the HAMMER symbol changes to a new position on the top row, all symbols on the reels below it are transformed into WILDS. The HAMMER feature does not trigger if the HAMMER symbol is not fully visible on the top row or does not change position after a tumble.

PROGRESSIVE FEATURE

In the base game, a snake with 11 sections appears.

When the game starts or the bet is changed, all of the 11 sections are inactive. Hit WILD DICE symbols to activate a number of sections, depending on the number of dots on each WILD DICE.

When all of the 11 sections are activated, the BONUS game is awarded.

If while playing and activating sections, the number of dots on the WILD DICE would activate up to the 4th section exactly, a random number of extra rolls, from 2 to 5, will be added to the BONUS game that will start when the snake is fully completed.

If enough dots are hit on the WILD DICE to fully fill the snake more than once, extra retriggers for the subsequent BONUS game will be awarded, one for each fill.

The BONUS game is awarded immediately after the snake is fully filled at least once and if on the last collection more than enough sections are activated, the difference is kept until going back to the base game and will be part of future collections.

The progress on the snake is saved for every possible bet and returning to a certain bet will load the progress.

Changing the bet while collecting, resets the active sections on the snake back to none or to the previously saved progress.

SNAKES & LADDERS BOARD BONUS

Fill all 11 sections of the snake in the base game or hit 3 or more BONUS symbols to trigger the SNAKES & LADDERS BOARD BONUS.

When the BONUS starts by filling the snake, you start with 12 dice rolls plus any extra rolls gotten in the base game, maximum possible 17 rolls.

When the BONUS starts by hitting BONUS symbols, a number of rolls is awarded as follows:

5 BONUS symbols - 16 dice rolls.
4 BONUS symbols - 14 dice rolls.
3 BONUS symbols - 12 dice rolls.

In the BONUS game the player is presented with a board of 144 squares, on a grid of 12x12.

The player is represented by a monkey head which, in the beginning of the game is placed on square 1.

At the beginning of the game, random items are placed in random squares on the grid: money awards expressed as multiplier of total bet, multipliers for the total win, ladders of any size, snakes of any size and bananas.

During the game, for every roll, 2 dice give a random result, from 1 to 6 dots on each. After every roll, the monkey head moves a number of places on the grid according to the total number of dots from both dice.

The monkey head can land on a square with one of the following:

Money award - A random value from 4x to 100x total bet. Landing on a square with money award adds this value to the total win of the round.

Multiplier - A multiplier that when the monkey head lands on will multiply the total win that has been collected so far.

Ladder - The ladder is a shortcut that takes the player from a lower square to another square higher up the grid. When the monkey

head lands on the lower base of the ladder, it will automatically move to the square where the upper end of the ladder is.

Snake - The snake is a shortcut that takes the player from an upper square to a lower square. When the monkey head lands on the head of the snake, it will automatically move to the square where the tail end of the snake is.

Banana - Landing on a banana will trigger a sequence where random money award values are added to the grid in random positions and all other bananas on the grid are removed.

Randomly, any square can have a hidden shortcut, the skyscraper. When the monkey head lands on a square with a skyscraper, the shortcut will show and the monkey head will be moved in a random position higher on the grid than this square.

The round ends when there are no more rolls or the final square, number 144, is reached. At the end of the round, the total amount collected so far is awarded.

The BONUS game has a minimum guaranteed win of 20x total bet. If when rolls are finished, the currently collected amount is below 20x total bet, it will enter RAGE MODE and the monkey head will move from current position to the end of the grid by passing all of the remaining positions in order and collecting all of the values and multipliers that it passes over, applying the total of all multipliers collected to the final amount. While in rage mode, the monkey head ignores all ladders, snakes, bananas and skyscrapers.

If at any point, the monkey head reaches square 144, the round immediately ends and a chance for a retrigger is presented. The game will do a roll of 2 dice and if the result is 1-1, 2-2, 3-3, 4-4, 5-5 or 6-6 the BONUS game is retriggered and starts from the beginning.

The number of rolls in the retriggered game is the same as the rolls from the initial BONUS game.

Due to the fact that the snake can be filled multiple times in the same spin in the base game, multiple BONUS games can be queued to be played in order.

The total win of the round is equal to the total amount collected from all BONUS games that were played.

	<p>This is the ISLAND bonus symbol. It appears only on reel 3. Hit a single ISLAND bonus symbol to trigger the FREE SPINS feature with 12 guaranteed starting free spins.</p>

During the FREE SPINS round, the RELIC symbols are also money symbols and at every spin they take a random value from a predefined set. Possible values are:

	2x, 3x, 5x, 7x or 10x total bet.		3x, 5x, 10x, 15x or 20x total bet.
	5x, 10x, 15x, 20x or 30x total bet.		10x, 20x, 30x, 50x, 500x or 5000x total bet.

At every spin, the WILD symbol moves and stops on a random position on the screen replacing what would hit under it. Then it will collect the values of all the RELIC symbols that are on the 8 positions around it within the symbol grid.

Every time a money symbol is collected, the RELIC it represents is also collected in a trail.

- After 4  are collected in the trail, all future money collections with WILD from this symbol are going to be multiplied by x3.
- After 3  are collected in the trail, all future money collections with WILD from this symbol are going to be multiplied by x5.
- After 3  are collected in the trail, all future money collections with WILD from this symbol are going to be multiplied by x10.

When a trail is completed 3, 4 or 5 guaranteed free spins are awarded but not more than the number of guaranteed free spins won at the start of the feature, up to a maximum of 8, 10 or 12 total guaranteed free spins remaining.

After all the guaranteed free spins finish, a totem will appear on the screen moving to random positions along with the WILD at every spin. If the totem ever stops on the same position as the WILD, the round ends. Otherwise the game will keep giving additional free spins one by one until this happens. It is possible for the totem to appear directly on top of the WILD immediately after the guaranteed free spins end.

Getting additional guaranteed free spins from filling the relic trails while the totem is on the screen, will make the totem disappear and come back only after the remaining guaranteed free spins are finished.

If the ISLAND symbol hits during free spins, random RELICS with random values are going to be added on the screen at random positions.
Special reels are in play during the feature.

MYSTERY PRIZE

At the end of the FREE SPINS feature, if the total win of the feature is below 2250x total bet, the player can opt to take the win amount as it is or replace it with a mystery prize that can be smaller or higher than the current value, in a random manner.

This is the SCATTER symbol.

SCATTER symbol appears on all reels.

TUMBLE FEATURE

The TUMBLE FEATURE means that after every spin, winning combinations are paid and all winning symbols disappear. The remaining symbols fall to the bottom of the screen and the empty positions are replaced with new symbols coming from above.

Tumbling will continue until no more winning combinations appear as a result of a tumble.

All wins are added to the player's balance after all of the tumbles resulted from a base spin have been played.

MULTIPLIER SPOTS FEATURE

Whenever a winning symbol explodes it marks its spot on the grid. After the second time a symbol explodes on the same spot a multiplier is added to the spot, starting from x2 and doubling every time one more symbol explodes on top of it up to a maximum of x128. The multiplier applies to all winning combinations that hit on top of it. If more multipliers are involved in the same winning combination, they add to each other.
In the base game all the marked spots with multipliers last until the end of the tumbling sequence, being cleared when there are no more tumbles.

FREE SPINS

Hit 3, 4, 5, 6 or 7 SCATTER symbols anywhere on the screen to win 10, 12, 15, 20 or 30 free spins respectively. During the FREE SPINS round marked spots and their multipliers remain in place until the end of the round and can increase with subsequent tumbles across all of the free spins.

Hit 3, 4, 5, 6 or 7 SCATTER symbols during the round anywhere on the screen to win 10, 12, 15, 20 or 30 additional free spins respectively.

Special reels are in play during the feature.

MAX WIN

The maximum win amount is limited to 5,000x bet in both base game and free spin. If the total win of a FREE SPINS ROUND reaches 5,000x bet the round immediately ends, win is awarded and all remaining free spins are forfeited.

BUY FREE SPINS

The FREE SPINS ROUND can be instantly triggered from the base game by buying it for 100x current total bet. When buying the FREE SPINS round, you can hit 3, 4, 5, 6 or 7 SCATTER symbols randomly.

VOLATILITY

High volatility games pay out less often on average but the chance to hit big wins in a short time span is higher.

The game starts from level 1 and has a multiplier of 1x.

Each time you score a goal, you level up. When you level up, for the next 10 spins a multiplier applies to the total win of all spins. Scoring one more goal while a multiplier is active resets the number of spins back to 10 and the multiplier increases as follows:

Level 3 - 4x Multiplier	Level 8 - 14x Multiplier
Level 4 - 6x Multiplier	Level 9 - 16x Multiplier
Level 5 - 8x Multiplier	Level 10 - 18x Multiplier
Level 6 - 10x Multiplier	Level 11 - 20x Multiplier

If you have achieved Level 11 with a multiplier of 20x, scoring more goals will reset the number of spins back to 10.

There is no limit to how many times the number of spins can be reset.

If you do not score a goal in the 10 spins awarded by leveling up, the game is reset back to level 1 and the multiplier resets to 1x.

The normal symbols fade away and only the MONEY symbols that triggered the feature remain, moving to the middle cells of the screen. The normal reels are replaced with special reels containing only MONEY symbols and empty spaces.

Whenever a MONEY symbol hits and is adjacent vertically or horizontally with at least another MONEY symbol, they link to each other, forming a group. All the MONEY symbols in the group have their value increased to the next possible higher value.

You start with 3 respins. All MONEY symbols that hit and link after each respin, remain on the screen until the end of the round. Every time at least one MONEY symbol hits and links, the number of respins is reset to 3. The round continues until respins are finished or all positions on the screen are filled with MONEY symbols.

MONEY symbols that hit but don't link remain on the screen until the end of the round and do not pay at the end of the round. If during the round they link with newly hit symbols they will start behaving as linked symbols, paying at the end.

When the HOLD & SPIN SUPER BOOST feature is complete, the values of all linked MONEY symbols are added and the game pays the total amount. If all 15 positions are filled and linked, the value of all MONEY symbols on the screen will be boosted to the highest value, MEGA.
