JetX

What is jetx:
Jetx is a game from smartsoft where you can quickly and easily win money

How to play jetx
Place a bet before the jet takes off. You can place a single bet or two bets on the same jetx flight.
The minimum stake is R and the maximum is R.
Use the +/- buttons alongside each bet option to adjust the bet size.
Use the "collect" button to collect winnings.
Try to fly as high as possible and cash out before the jet explodes. Flight height is not determined and varies from 1 to the max win cap.
Use "autoplay" to automatically place the same bet value for each new round. You can do this on one or both bet selections. The minimum odds for auto collect is 1.35x.
In the left corner of the game panel, coefficients statistics and game history are presented. Values are displayed in green and red: the red colour indicates the coefficients that are less than 1.5 and green more than 1.5.

How is the win calculated?
The potential profit is calculated by multiplying the current flight coefficient and the made bet.
Minimum multiplier (coefficient) is 1.00x. Max win per bet is 25,000x.
When the maximum win cap is reached, the win amount is auto collected.
The speed or skill of the player does not influence, or increase the chances of winning, or define the outcome of the game.

How do i get the winnings?
Use the collect button before the explosion (the profit is instantly reflected on the balance). If the explosion happens, the stake is considered lost.

Rtp for the game is 96.7-98.8%.
The maximum rtp can be achieved by the player when opting to bet on the lowest possible crash multiplier, also when maximum coefficient to 25,000x is reached, the win amount is auto collected.

What happens if i get disconnected?
If the player gets disconnected and the bet is active: 1. The bet continues to play until the round finishes, the player can manually collect the win if returning before the round end. Otherwise, the bet continues to play until it loses or reaches the max win cap. 2. If the "autocashout" is enabled, the win will automatically be collected if the jet reaches the pre-setted multiplier.
Malfunction voids all pays and plays.

Balloon

Select the desired bet to start the game and press the press & hold button. Hold the button until you wish to exit the bet. The amount you can win increases the longer the button is pressed. By releasing the press & hold button before the balloon blows, you will win. The amount is the balloon's value multiplied by bet. For three seconds after releasing the pressed button, you are allowed to increase the current value of money won by pressing and holding it again. The balloon's value varies from 1 to infinity. The minimum bet is R, and the maximum is R. The maximum profit is R.

To begin, choose the desired bet. Next, click and hold the purple button to inflate the balloon. Remove the mouse pointer/finger just before the balloon pops to win! The speed or skill of the player does not influence, or increase the chances of winning, or define the outcome of the game.

The bigger the balloon gets, the bigger the multiplier! The win amount is calculated as the balloon's value multiplied by the bet.

Rtp 95.5 - 98.0 %.

If you are disconnected during the active round or the game window is closed, your bet will be automatically cashed out at the current multiplier value.
Malfunction voids all pays and plays.

Football X

Select a bet amount using the "- " "+" or the scroll buttons. To start the game, click the "play" button. The total amount of your bet is displayed in the betting field. You can play the game manually or in autoplay mode. Once a game round is finished, place a new bet to start the next round.

How to win
Your mission is to cash out before a crash happens (before the footballer falls down). Succeed, and you'll win your bet multiplied by the current multiplier. The game begins with a 1.00x multiplier, which increases as you play. You can manually or automatically cash out at any value. If the crash occurs at 1.00x, the bet placed in that round is automatically lost. If the multiplier value reaches 100x, the bet is automatically paid out, and the round ends. Your win amount is shown in the win notification.

Choose your character
You can choose your favorite football character before the game starts. All the characters have the rtp .

The theoretical rtp of the game is 96%. The maximum rtp can be achieved when betting on the lowest possible crash multiplier. The maximum multiplier value for the game is 100x your bet.

If you are disconnected during an active round or the game window is closed, your bet will be automatically cashed out at the current multiplier value. If this occurs during autoplay mode, your bet will be cashed out at the current multiplier value with autoplay ending.

Misuse or malfunction voids all pays and plays.
Min bet= R 1

Max bet = R
50 000

Max win = R   5 000 000

Cricket X

What is cricketx?
Cricketx is a new game from smartsoft. In which you can quickly and easily win money.

How to play cricketx?
Enter the desired amount in the betting line. You have an option to place one or two bets on the same flight. The minimum stake is R, and the maximum is R.
Click the button–place your bet, observe-what height ball will take. The development of ball height is not determined and varies from 1 to infinity. Use-before the explosion use collect, or use auto collect out function beforehand (on what height you want to exit the game).
Each bet can set manually or use auto for a pre-settled bet and collect multiplier. "auto bet" and "auto collect" functions activate after marking when a new round start. Minimum odd for auto collect is 1.35.
In the left corner of the game panel, coefficients statistics history is presented. Odds are reflected in the statistics after explosion of the upcoming round. Values are displayed in green and blue color: blue indicates the coefficients that are not more than 1.5 and green-more than 1.5.

The profit is calculated by multiplying the current height coefficient and the made bet. Minimum multiplier (coefficient) is 1.00x. Max win R.

You have won the amount, if you had used the collect button before the explosion (the profit is instantly reflected on the balance). In the explosion happens, the stake is considered lost.
Rtp for the game is 96.7-98.8%. The maximum rtp can be achieved by the player when opting to bet on the lowest possible crash multiplier (coefficient). Also, when maximum coefficient to 25,000x is reached, the win amount is auto collected.

What happens if i get disconnected?
If the player gets disconnected and the bet is active: 1. The bet continues to play until the round finishes, the player can manually collect the win if returning before the round end. Otherwise, the bet continues to play until it loses or reaches the max win cap. 2. If the "autocashout" is enabled, the win will automatically be collected if the jet reaches the pre-setted multiplier.
Malfunction voids all pays and plays.

PlinkoX

Help
Choose the bet amount using «-», «+»
The calculation of the win is made according to the paytable.
Min/max bet= R

Max win= R

Max multiplier= 10,000x

There are 3 different types of balls and each of them can come out during the round randomly.

Ball 1 = 1x

Ball 2 = 5 x

Ball 3 = 10 x

At the end of round ball lands on button tab where are different multipliers from 0.20x up to 1,000x.

In case if 10x ball will fall to 1,000x multiplier it will pay 10,000x more than a round bet.

Rules
The goal is to win money by dropping the pinkox ball and waiting till it randomly lands in the x slot at the bottom of the board.
In autoplay mode, you can choose a number of spins and configure other settings of play.
Turbo mode: selects the turbo drop mode when plinko x ball will drop faster.
The theoretical rtp of this game is 97.0%.
Malfunction voids all plays and pays! All unfinished rounds will be terminated.
If the players get disconnected, all current bets will be completed automatically and prizes will be paid.

JetX3

what is jetx3

Jetx3 is a smartsoft game where you can easily win money

How to play jetx3

place your bet until the round starts. You can bet on jet1, jet2 or jet3 ships. The minimum bet is R the maximum bet is R.

Players can choose different bet sizes and coefficients for each jet. Use autoplay to auto bet and auto collect. Once the game starts, try to cash out before the jet explodes. If you bet on all three ships and one or several of them explodes, you will still have a chance to win from the other jets

How is the wining calculated?

Winnings are calculated by multiplying the current odds and placed bets.

How i receive the winning?

Click collect before the jet explodes. If the jet explodes, all bets for exploded jets are lost

What happens if i get disconnected?

If the player gets disconnected and the bet is active: 1. The bet continues to play until the round finishes, the player can manually collect the win if returns until the round end. Otherwise, the bet continues to play until it loses or reaches the max win cap. 2. If the "autocashout" is enabled, the win will automatically be collected if the jet reaches the pre-setted multiplier. The winning amount will be added to your balance.

Malfunction voids all pays and plays.

rtp - 97.0%.
